Subject: Update of CRS Report on Pavillion Groundwater Investigation

Hi Carolyn,

As you may recall, my colleagues and I had prepared a report for Congress on EPA's investigation of potential groundwater contamination in the area of Pavillion, Wyoming under the authorities of CERCLA. We had shared the original version of the report with you.

We since have updated the report to reflect EPA's decision not to finalize the draft report for the groundwater investigation, and instead to defer to the State of Wyoming to assume the lead in investigating drinking water quality in the area, with EPA playing a supporting role in that state effort.

I thought I would share the update with you, attached in PDF format. The update was released to Congress today. If you may have any questions about our work on this topic, please feel free to contact me at 202-707-2390 or by email.

Best Regards,

David M. Bearden
